**Neopost Introduces the IJ105 in the US –  
The Ideal High Speed Digital Postage Solution For Demanding Mail Centers**

Neopost, the worldwide provider of mailing, addressing, document handling and logistics systems, introduces to the U.S. market its IJ105 digital mailing system. Neopost's IJ105 is the ultimate in-motion weighing system for large mailings, combining an unprecedented level of high-speed performance and quality. The IJ105 is the latest addition to Neopost's series of new digital mailing systems that are IBI compliant.

The IJ105's speed and modularity offers a long lasting solution to companies with sizable monthly mailings or large direct mail marketing programs. Ranked as one of the fastest digital mailing systems for mixed weight and in-motion processing, the IJ105 can output up to 217 letters per minute.

The IJ105 is designed to meet the most demanding mail center needs. It features the only touch screen and keyboard system on the market. Unlike other products that have a key command, the IJ105 uses innovative technology that enables users to easily navigate by simply touching the screen. Its advanced features also include fast processing of mail pieces of varying thickness, a static weighing platform for parcels and large items, and an in-motion weighing platform that automatically prints the correct postage.

Additionally, the IJ105 utilizes Hewlett-Packard inkjet technology ensuring an "ultra-secure," two-dimensional IBIP postage indicia with crisp, clear print quality. Other standard features include six preset memorized jobs, quick and easy postage refill (via direct modem connection), USPS domestic and international mail classes and special services, ten advertising messages, and departmental accounting. A high-capacity power stacker and other high performance options are also available.

The IJ105 is available through Neopost's network of more than 150 branch offices and dealer locations throughout North America. For sales information, call the customer hotline at 1-888-

Neopost (636-7678), or visit [www.neopostinc.com](http://www.neopostinc.com).

### **About Neopost**

Neopost is the second largest provider of mailing, addressing, document handling and logistics systems worldwide. Neopost allocates an industry leading percentage of its resources to R&D and is the only company that exclusively focuses on mailing, logistics and document handling products. Neopost's products are sold in 70 countries, with primary operations in the world's top mailing markets including the United States, Canada, France, Germany and the United Kingdom. Visit Neopost at [www.neopost.com](http://www.neopost.com).

Neopost Inc. is a U.S. subsidiary of Neopost and its corporate offices, customer service, and product development departments are based in San Francisco, California. Local sales and support are available throughout North America.

Neopost's history dates back to the 1920s when the organization's founders introduced the first postage meters in Europe. Over the years, the company has continued to serve as a leader in the design and manufacture of modular mailing, document handling, logistics and e-postage products.

Neopost is the world leader in sales and development of desktop and tabletop folder inserters. Neopost's innovations in the folder inserter market include: the first compact desktop folder inserter; the first tabletop folder inserter that inserts into both flats and business-size envelopes; and high security optical mark reading similar to costly floor models. Neopost's unique Load 'N Go mode, featured in its SI68 and SI76 folder inserters, automatically detects which feeders have paper, then adjusts settings such as fold type, fold length, envelope size, paper length and paper thickness. Load 'N Go virtually eliminates operator adjustments and the need to program every job.

For more information, visit Neopost Inc. at [www.neopostinc.com](http://www.neopostinc.com) or call 1-888-Neopost (636-7678).
