Neopost Inc. Introduces Mail Accounting Solutions

Simple, intelligent methods for improving mailroom efficiency and streamlining costs

Neopost, the worldwide provider of mailing, addressing, document handling and logistics systems, announces the introduction of a complete line of Mail Accounting solutions. These solutions are designed to provide medium-sized mailrooms and large mail centers with the ability to better track and report postal expenditures in order to reduce costs, improve efficiencies, increase productivity and make better, more informed decisions. Neopost's Mail Accounting solutions are ideal for a range of organizations with significant mailroom operations, including educational and financial institutions, insurance firms, hospitals and government agencies.

The flexible Mail Accounting product line offers everything from basic accounting and reporting systems, to an integrated shipping system for rate shopping and multi-carrier compliance, to data consolidation from multiple mail machine workstations. With their most comprehensive package, the system lets mailroom managers track postage expenses, charge back expenses to departments and create management reports to provide maximum postage and shipping cost visibility.

This Mail Accounting product line can be combined with a variety of different Neopost mail and shipping systems to create a comprehensive mail center solution.

About Neopost

Neopost (Paris Exchange 12056), is the second largest provider of mailing, addressing, document handling and logistics systems worldwide. Neopost allocates an industry leading percentage of its resources to R&D and is the only company that exclusively focuses on mailing, logistics and document handling products. Neopost's products are sold in 70 countries, with primary operations in the world's top mailing markets including the United States, Canada, France, Germany and the United Kingdom. Visit Neopost at www.neopost.com.

Neopost Inc. is a U.S. subsidiary of Neopost and its corporate offices, customer service, and product development departments are based in San Francisco, California. Local sales and support are available throughout North America.

Neopost's history dates back to the 1920s when the organization's founders introduced the first postage meters in Europe. Over the years, the company has continued to serve as a leader in the design and manufacture of modular mailing systems, addressing systems, postage meters, electronic postage scales, and e-postage products.

Neopost's innovations include the first electronic postage meter, the first postage meter and scale system providing automatic meter setting from the scale, and the first compact desktop folder inserter. Other innovations include Neopost's No Deposit Postage-On-Call®, the first remote meter resetting system not requiring prepayments; and the Neopost Price Protection Program®, which guarantees a fixed cost for the life of the contract and provides one monthly or quarterly payment. Neopost's unique Load 'N Go mode, featured in its SI68 and SI76 folder inserters, automatically detects which feeders have paper, then adjusts settings such as fold type, fold length, envelope size, paper length and paper thickness. Load 'N Go virtually eliminates operator adjustments and the need to program every job. Most recently, Neopost introduced the IJ25, the first stand-alone digital postage meter to comply with the United States Postal Service's Information-Based Indicia Program (IBIP) for simultaneous metering and barcode generation.
