Neopost Announces New Mailing Systems for Office Environments

IJ 40, IJ 50 and IJ 60 Offer Mailing Solutions for Businesses

Neopost, the worldwide provider of mailing, addressing, document handling and mail management systems, introduces its new line of mailing systems for businesses with varying mail requirements. The IJ 40, IJ 50 and IJ 60 digital mailing systems have been designed with productivity in mind, as these units feature digital printing, an automatic feeder and an optional differential weighing platform. Capable of processing at speeds up to 110 letters per minute (LPM), these digital mailing systems operate at performance levels not typically available outside major mail centers.

Highly efficient and affordable, the IJ 40, IJ 50 and IJ 60 systems enable businesses to track mailing expenditures for up to 150 different departments. In addition, these models are fully loaded with standard features, such as job memory presets, an automatic label dispenser and an envelope path adjustment that helps to feed and process various mail sizes at top speed. Extremely cost effective, these systems offer the lowest cost per imprint on the market.

Capable of simplifying the mailing process for any business, the IJ 40, IJ 50 and IJ 60 digital mailing systems from Neopost are able to communicate with a PC, which allows users to export and analyze data, minimizing mailing expenditures. These mailing systems also offer direct connect postage downloads and produce customized slogans for targeted mailings. With their compact design, the IJ 40, IJ 50 and IJ 60 systems can expand mailing capabilities in any office environment.

The IJ 40, IJ 50 and IJ 60 digital mailing systems are available through Neopost's network of more than 150 branch offices and dealer locations throughout North America. For sales information, call the customer hotline at 1-888-Neopost (636-7678), or visit www.neopostinc.com.
