For Immediate Release

Neopost Introduces New Modular Furniture Systems For Mailing Equipment, Shipping Systems And Mail Distribution

Hayward, Calif. Feb. 17, 2000 -- Neopost Inc., the world's second largest mailroom equipment provider, today announces the launch of its complete line of modular furniture systems. The furniture includes tables, risers and sorters that can be customized to provide a sturdy and functional surface for all mailing and shipping applications. The furniture is also available in designer colors that match most mailroom décor.

In addition to providing sturdy support for mailing and shipping applications, Neopost's furniture can be used to create mail sorting systems for internal distribution of incoming mail. Customers can choose specific sorters and risers to design a specialized sorting system that ensures mail will be processed quickly and cost effectively at each stage.

Neopost's modular furniture systems enable customization of an individual workstation or an entire mailroom system for optimal functionality and productivity. To facilitate this, Neopost offers many optional components to accommodate specific customer needs. For example, tables of various lengths can be supplemented with risers, sorters, shelves, doors and back panels for maximum organization and information display.

Neopost's modular furniture systems are available through Neopost's network of over 150 branch offices and dealer locations throughout North America. For sales information, call Neopost at 800-624-7892.

About Neopost

The Neopost Group is a leading provider of mailing systems, addressing systems, document handling systems, logistics systems, and e-postage products worldwide. Neopost Inc. is headquartered in Hayward, Calif., where the corporate offices, customer service and product development departments for the Neopost Group in North America are located. Local sales and support are available throughout North America.

Neopost is the world leader in sales and development of desktop and tabletop folder inserters. Neopost's innovations in the folder inserter market include: the first compact desktop folder inserter; the first tabletop folder inserter that inserts into both flats and business-size envelopes; and high security optical mark reading similar to costly floor models.

Neopost's history dates back to the 1920s when the organization's founders introduced the first postage meters in Europe. Over the years, the company has continued to serve as a leader in the design and manufacture of modular mailing, logistics, document handling and e-postage products. The Neopost Group has operations in the world's top mailing markets: the United States, Canada, France, and the United Kingdom. Today, Neopost's products are sold in 70 countries.
