Neopost Inc. Announces Formation of Neopost University

Dedicated to the delivery of world-class training and development

Neopost, the worldwide provider of mailing, addressing, document handling and logistics systems, has announced the formation of Neopost University, a program that takes advantage of the company's best-in-industry product knowledge to deliver world-class training and development to employees and partners.

The academic program will feature a continuously expanding curriculum which will include: industry and product training; customer service training; computer, business and management skills training; as well as professional development and career planning tools.

Neopost University will feature interactive multimedia product knowledge certification programs, online courses, and classroom sessions at Neopost's Hayward, CA and Dallas, TX facilities. The online presence will provide employees with access to a personalized curriculum, development plans, course descriptions and registration options.

According to Michael Gilbert, Director of Training, "Neopost University is an exciting development within an exciting and innovative company. Neopost is made up of exceptional people who appreciate new opportunities to develop their skills and knowledge. This program now provides these opportunities."

About Neopost

Neopost (Paris Exchange 12056), is the second largest provider of mailing, addressing, document handling and logistics systems worldwide. Neopost allocates an industry leading percentage of its resources to R&D and is the only company that exclusively focuses on mailing, logistics and document handling products. Neopost's products are sold in 70 countries, with primary operations in the world's top mailing markets including the United States, Canada, France, Germany and the United Kingdom. Visit Neopost at www.neopost.com.

Neopost Inc. is a U.S. subsidiary of Neopost and its corporate offices, customer service, and product development departments are based in San Francisco, California. Local sales and support are available throughout North America.

Neopost's history dates back to the 1920s when the organization's founders introduced the first postage meters in Europe. Over the years, the company has continued to serve as a leader in the design and manufacture of modular mailing systems, addressing systems, postage meters, electronic postage scales, and e-postage products.

Neopost's innovations include the first electronic postage meter, the first postage meter and scale system providing automatic meter setting from the scale, and the first compact desktop folder inserter. Other innovations include Neopost's No Deposit Postage-On-Call®, the first remote meter resetting system not requiring prepayments; and the Neopost Price Protection Program®, which guarantees a fixed cost for the life of the contract and provides one monthly or quarterly payment. Neopost's unique Load 'N Go mode, featured in its SI68 and SI76 folder inserters, automatically detects which feeders have paper, then adjusts settings such as fold type, fold length, envelope size, paper length and paper thickness. Load 'N Go virtually eliminates operator adjustments and the need to program every job. Most recently, Neopost introduced the IJ25, the first stand-alone digital postage meter to comply with the United States Postal Service's Information-Based Indicia Program (IBIP) for simultaneous metering and barcode generation.
