**Neopost Introduces the Latest Addition to its  
Line of Folder Inserters - the SI30**

*Affordable mailing solution for small businesses, satellite offices and corporate departments*

Neopost, the worldwide provider of mailing, addressing, document handling and logistics systems, introduces the latest addition to its line of folder inserters. Small businesses, satellite offices and corporate offices with low to medium mail volume can now benefit from the same advanced technology that provides the precision, reliability and speed associated with large volume mailing systems.

The Neopost SI30's simple and intuitive user interface enables all personnel to operate the machine without being trained, and there is no need for a dedicated operator. This automated system can fold and insert 1,350 documents per hour, ten times faster than performing this task manually. The high capacity feeders require fewer material loadings and permits employees to spend their time on value-added tasks instead of monitoring the system. The SI30's feeder swap feature increases mailing productivity, allowing the system to continue running while being loaded.

Neopost's unique Secure 'N Feed technology incorporated into the SI30 provides the highest level of double document mailing security, and virtually eliminates the risk of information being sent to the wrong addressee. In addition, the machine can operate with the presence of paper dust, and can accommodate any print density and a variety of paper colors and thickness.

**About Neopost**

Neopost (Paris Exchange 12056), is the second largest provider of mailing, addressing, document handling and logistics systems worldwide. Neopost allocates an industry leading percentage of its resources to R&D and is the only company that exclusively focuses on mailing, logistics and document handling products. Neopost's products are sold in 70 countries, with primary operations in the world's top mailing markets including the United States, Canada, France, Germany and the United Kingdom. Visit Neopost at [www.neopost.com](http://www.neopost.com).

Neopost Inc. is a U.S. subsidiary of Neopost and its corporate offices, customer service, and product development departments are based in San Francisco, California. Local sales and support are available throughout North America.

Neopost's history dates back to the 1920s when the organization's founders introduced the first postage meters in Europe. Over the years, the company has continued to serve as a leader in the design and manufacture of modular mailing, document handling, logistics and e-postage products.

Neopost is the world leader in sales and development of desktop and tabletop folder inserters. Neopost's innovations in the folder inserter market include: the first compact desktop folder inserter; the first tabletop folder inserter that inserts into both flats and business-size envelopes; and high security optical mark reading similar to costly floor models. Neopost's unique Load 'N Go mode, featured in its SI68 and SI76 folder inserters, automatically detects which feeders have paper, then adjusts settings such as fold type, fold length, envelope size, paper length and paper thickness. Load 'N Go virtually eliminates operator adjustments and the need to program every job.
