**Neopost Enhances its Most Advanced Folder  
Inserter System for Education's High-Volume Mailing Market**

*New System Offers Reverse Reading Capabilities*

Neopost, the worldwide provider of mailing, addressing, document handling and logistics systems, enhances its SI92 tabletop folder inserter system. The most advanced folder inserter on the market, the SI92 now offers reverse reading capabilities, ending document set identification problems and increasing productivity. Ideal for processing tuition bills, enrollment information and grade notices, the reverse reading capabilities provide maximum flexibility, enabling Optical Mark Reading and variable page document set collation and insertion, regardless of the user's printing constraints.

Featuring the most leading edge innovations in the industry, the SI92 features centralized control settings, making it user-friendly, simple to program, and easy to adjust between jobs. In the event of stoppage, real time "help" messages with large graphic display enable users to pinpoint the stoppage location, and the easy accessibility feature allows for quick, easy, and safe removal of stopped documents.

The SI92 offers other valuable benefits that result in faster problem resolution, increased productivity and maximum system up time. The dual track Optical Mark Recognition (OMR) is the most secure form of OMR in the industry. It increases security because it reads the same amount of marks on every form, making sure an ink smudge or accidental mark is detected as an error, not a command. The errors are then redirected to one of two divert stations and the system doesn't stop.

The SI92 can operate with the presence of paper dust, with any print density, and with any paper color or thickness. Its high-capacity, multi-functional feeders can feed jobs varying in paper size - eliminating the need to buy extra feeders or an additional inserting system. The SI92

is uniquely designed to check for correct document thickness at feed stations and at the point of insertion, ensuring that business-critical documents such as statements and invoices are accurately inserted.

The SI92 folder inserter is available through Neopost's network of more than 150 branch offices and dealer locations throughout North America. For sales information, call the customer hotline at 1-888-Neopost (636-7678), or visit [www.neopostinc.com](http://www.neopostinc.com).

## **About Neopost**

Neopost is a leading provider of mail, folding/inserting and mail accounting solutions, with products sold in the 5 largest global markets. Over Neopost's 80 year history, the company has produced many significant product breakthroughs, including everything from the first electronic postage meter, to the first folder/inserters with automated setting adjustments, to its flagship digital ink jet mailing systems. Neopost's innovative products and services all have one thing in common: they bring simplicity and efficiency to the complete mailing process in order to make businesses run more effectively.

For more information, call 1-888-Neopost (636-7678) or visit Neopost at [www.neopostinc.com](http://www.neopostinc.com).
