

AS 226

AS 226 Address Printing System

It's the high speed, professional desktop address and barcode printer built upon HP Inkjet Technology.

The Neopost AS 226 offers the opportunity to quickly, easily, and professionally print addresses and barcodes at up to 22,000 envelopes per hour.

Saves time – Mail is processed faster, so it gets to your customer sooner than mail with labels.

Saves money – Eliminates the expensive and time-consuming process of printing and applying address labels.

Increases response rates – by producing a professional and personalized image.

To learn how a Neopost system can help maximize your productivity, please contact your local Neopost Dealer or Account Executive. Or, call us toll free at 1-888-Neopost (636-7678), and ask for department MB11. You can also check us out on the Web at www.neopostinc.com.

Mail With Impact – With the Neopost AS 226, you can print variable addresses, return addresses, barcodes, and custom attention grabbing messages using any true type fonts.

Save Money – Neopost addressing software CASS and PAVE certifies your mail for USPS discounts!

Flexibility – Whether addressing items that are as thick as 3/8" or as large as 13.5" by 17", the AS 226 handles the task with ease. With our top-loading feature, items can be continuously loaded into the feeder while the printer is printing.

The power to achieve higher productivity.

The Neopost AddressJet software downloads all fixed information and graphics to the printer's memory so only the variable information is sent for each piece. There is no need to have your printing process slowed down while your computer downloads the graphic for each piece. It can print up to 22,000 #10 envelopes per hour without delay.

AS 226 Specifications
