

- Compact design
- Large, easy-to-read display
- Wide range of USPS rates and special services standard
- Shortcut programming key
- Configuration of special services or handling charges (\$, % or both)

FriendShip® ELITE600 Mail Accounting System

The Neopost *FriendShip*® *ELITE600* is an efficient and economical mail accounting system designed to help track and report postal expenditures for mailroom management and cost control. The *FriendShip*® *ELITE600* is a turnkey system that consists of FriendShip® mail accounting software and space-saving, PC-computer hardware. This system can be integrated with a wide range of Neopost mail machines for a complete postage-consolidation and detailed-reporting solution.

The Neopost FriendShip® ELITE600 Description

The Neopost *FriendShip*® *ELITE600* provides the detailed information that managers need to control the over use of high-cost services and special fees. This, in turn, also helps to maximize the use of postal discounts. For users who would like to know the delivery status of what they send, the *FriendShip*® *ELITE600* comes standard with a certified module that supports USPS electronic delivery confirmation with signature capture.

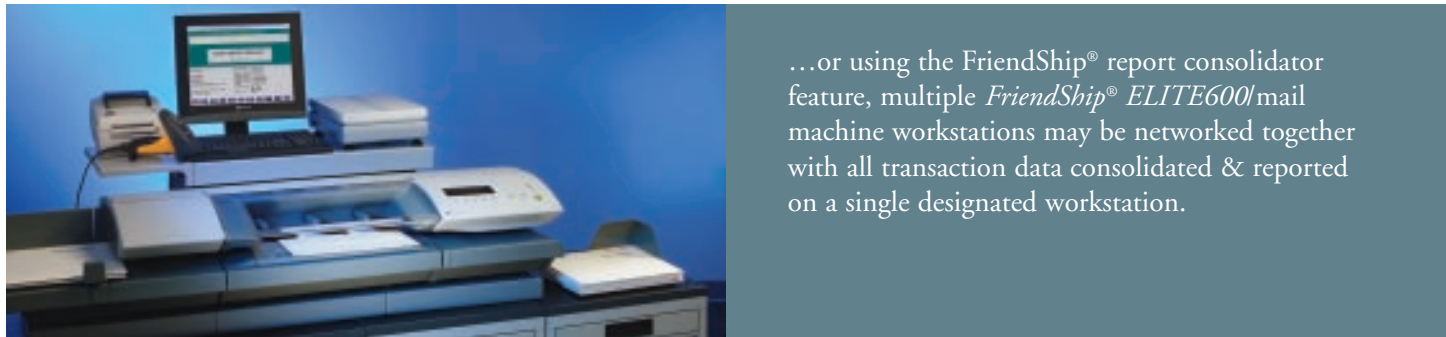

Mailrooms no longer need to absorb the cost of the mailing operation as overhead. *FriendShip*® *ELITE600* provides the ability to track and report all postage expenditures, while simultaneously charging postage usage to pre-established department or cost-center budgets. It also eliminates unaccounted costs by automatically tracking and charging back ancillary mailroom expenses to departments. The *FriendShip*® *ELITE600* saves money, reduces operator errors, and boosts productivity.

Features

- Track postage costs against pre-established budgets
- Real-time account/department validation
- Multi-piece weighing
- Report consolidation
- Unlimited number of accounts/departments
- USPS electronic delivery confirmation with signature capture
- Security for reducing unaccounted postage
- 16-character account/department field and 40-character account name field
- Two additional, user-definable, 16-character tracking fields
- Department/operator data import utilities
- Operator password security
- Online help tool

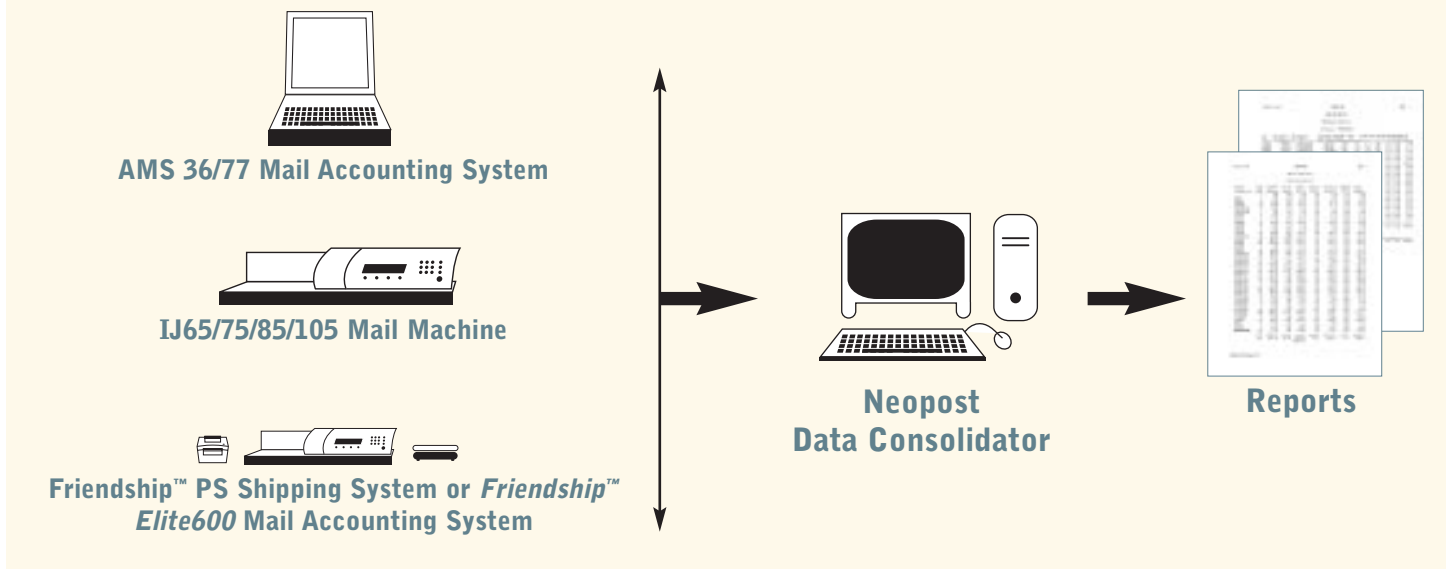

When used in conjunction with the Neopost Global consolidation software, this system has the ability to collect information from an unlimited number of FriendShip® workstations residing on the same network. The *FriendShip® ELITE600* can be interfaced to a single Neopost mail machine to provide all of the enhanced mail accounting functionality of a software based system....

...or using the FriendShip® report consolidator feature, multiple *FriendShip® ELITE600* mail machine workstations may be networked together with all transaction data consolidated & reported on a single designated workstation.

Neopost's solution gives you one set of data from all of your machines.
