

# IJ65, IJ75, IJ85 Mailing Systems

## Dynamic Scale (IJDS)

The IJDS In-Motion Weighing System combines performance, simplicity and style in a single integrated package. Now you can process mixed format mail in one single operation

- **High Speed:** Up to 130 letters per minute
- **Simple:** User definable rate structure
- **Automatic:** Full oversize 3D sensing, ensures accuracy
- **Efficient:** Improve productivity. Let the IJ system do the work
- **Modular:** Can be added to an existing installation
- **Reliable:** Self aligning mail feed system eliminates skew

To learn more about how the Neopost IJDS unit can help maximize the productivity of your IJ65, IJ75 or IJ85 Mailing System, please contact your local Neopost Dealer or Sales Representative. Or, call us toll free at 1-888-Neopost (636-7678), and ask for department MB07. You can also visit us on the Web at [www.neopostinc.com](http://www.neopostinc.com).

## FriendShip

When interfaced to the IJ65/75 and IJ85 family, the Neopost *FriendShip*® system provides efficient and economic advanced mail accounting.

- Enhanced expenditure tracking
- Detailed reporting
- USPS Electronic Confirmation Services

## Applications

- Medium to Large volume mailings with mixed weight and format items
- Bulk or Presort Mailings
- Requirement for wide feed deck to handle variable weight flats

## The Neopost Dynamic Scale

The IJ Dynamic Scale is a revolutionary in-motion weighing system that will weigh mixed mail pieces one by one and print postage according to weight and selected class. Operating at a top speed of 130 letters per minute on the IJ85 system, this in-motion weighing system will allow mail operators to quickly process large mailings in no time.

The Dynamic Scale determines weight, but is also capable of measuring length, width and thickness ensuring oversized surcharges are applied automatically as needed. The comprehensive list of USPS rates can be customized, guaranteeing that the postage rate you use most often is right at your fingertips.

The IJDS is engineered like no other dynamic scale on the market:

- |                    |   |
|--------------------|---|
| <b>Performance</b> | Maximum throughput is maintained by intelligent mail format sensing.                              |
| <b>Reliability</b> | The self-aligning feed system eliminates skew. The result: a crisp imprint every time.            |
| <b>Accuracy</b>    | Patented feed guides ensure each item is controlled while its weight is determined at high speed. |

The IJDS is compatible with the IJ65/75/85 products and can be retrofitted on any current installation.

## Features

- |  |   |  |                                |
|--|---|--|--------------------------------|
| • Maximum Thickness up to 1/2"             | • 35oz. Maximum weight capacity             | • Batch in-motion mode – Sample 1st item then full speed | • User customizable rate menus |
| • Oversize Sensors: Length/Width/Thickness | • Modular design allows for future upgrades | • Self aligning feed system eliminates skew              | • Comprehensive Rate Structure |
